## Feature 2

[READ MORE](#)

**Here all your crypto assets to manage are kept in your wallet all the time**

Decentralisation and smart contracts allow to manage cryptocurrencies on other wallets with no necessity to transfer any funds to trader

**MY PROBLEM NO 2:** I always felt uncomfortable with the idea to give my money to somebody in order to have them back with profit

# Market Analytics

The traditional trust management market. Since 2000 the global trust management market has grown by over 250%. This is a result of constant improvements in market tools and the general development of market structuring.

Despite the explosive growth of the cryptocurrency market in 2017, the industry is still in its infancy. The market capitalisation was \$600 billion at the end of 2017, which is still only 1% of the trust management industry.
